<i>DETACH ^HERE^ AND SUBMIT WRITTEN ANSWERS TO AUCTIONEER AT COMPLETION OF TODAY'S AUCTION.</i>											
MEMBER'S NAME _____											
SKILL QUIZ GUIDELINES: Eligibility to win prizes dependent on member's quality written answers to all three questions. Auctioneer decides total of three victors based on best written answers.											
FIRST PRIZE: 40 POINTS -				SECOND PRIZE: 24 POINTS -				THIRD PRIZE: 14 POINTS -			
JANUARY 2022 THEME: NEW BEGINNINGS !											
New designs! New Types! New Beginnings!											
<i>NOTE: This level of topic and complexity is well above our average quiz. Thus, winning points are all doubled !!</i>											
QUIZ: 1	<p><i>Sometimes the US Mint has failed (Gasp!) to test a new design sufficiently to anticipate problems and correct them pre-release. A classic example of this is the 1921 Peace \$. This gorgeous high relief design... wouldn't stack. Cite an example of new design oooopsies. What was the defect? How was it corrected, or how would you correct it?</i></p>										
QUIZ: 2	<p><i>Starting in 1837, silver coinage transitioned from Bust to Seated. Complex and a bit confusing to us 175 years hence - I suppose they had to weed through a lot of second guessing while critiquing and improving these original desins. Pick any one issue / design element (denomination / date / mintmark) and offer your perspective on what you think they did well, and not so well.</i></p>										
QUIZ: 3	<p><i>Let's bring our time machine back home to Y2022. Time to speculate. Name something that really should be changed in US coinage this year, and why.</i></p>
